

‘Is really *Syntipas* a translation? The case of *The faithful dog*’

J. Redondo (GIRLC, Universitat de València)

Abstract

The fable entitled ‘The faithful dog’ has been transmitted by means of a manifold sample of versions, from which Pausanias’ is the oldest, according with a sure chronology. It is commonly said that the Greek version afforded by the *Book of Syntipas the philosopher* is a mere XIIth cent. translation of the hypothetically reconstructed original Indian text. Our contribution suggests that the text of the *Syntipas*’ version does not follow the grammatical patterns of literary translation. Just on the contrary, it shows a striking lexical coincidence with the text given by Pausanias. Therefore, we conclude that the *Syntipas*’ version of ‘The faithful dog’ is an original text which has to be inserted into a Greek tradition.

Key-words: classical language, fable, folktale, Inoeuropean heritage, Koine, Pausanias, translation.

1. *Introductory.*

Several of the most expanded stories all along the Indo-european countries are related to the popular literature which of course can be found at the very core of their inherited tradition(s). Certainly, the tale of the dog, the baby and the snake is attested not so deeply, backwards in the past, as another interesting fable, that of the hawk and the nightingale, as this one is already attested in Hesiod's *Works and Days*¹. The oldest witness of our story, usually entitled ‘The faithful dog’ after the Latin medieval version

¹ Hes. *Op.* 203-212. See the accurated analysis of the fable in VAN DIJK, GERT-JAN. 1997. **AINOI, LOGOI, MUQOI.** *Fables in Archaic, Classical, and Hellenistic Greek Literature. With A Study of the Theory and Terminology*, Leiden, New York & Köln: Brill, pp. 127-134.

'Canis fidelis', should be the Aesopean fable entitled 'The Paysant and the Dog'. Nevertheless, it is not attested till the late collections such as L'Estrange's 1692 edition, and therefore it takes a secondary role regarding the transmission of the fable ². Other extant Asian and European versions have to be placed in the late Medieval Age, from the XIIIth. century onwards. *Sapienti pauca*, we must keep in mind that the alleged Indian, Persian and Syriac versions belong to the happy world of our modern reconstructions. Actually, the best witness for the antiquity of the Greek version is the II cent. A.D. historian Pausanias, whose text is the following:

Ἀμφικτύονες δὲ δόγμα ἐπὶ τῇ τῶν πόλεων ἀπωλείᾳ τῶν ἐν Φωκεῦσιν ἐξενεγκόντες, ὄνομα ἔθεντο αὐτῇ Ὀφίτειαν. οἱ δὲ ἐπιχώριοι τοιάδε ἐπ' αὐτῇ λέγουσι· δυνάστην ἄνδρα ἐπιβουλὴν ἐχθρῶν ἐποπτεύσαντα ἐς νήπιον παιῖδα, καταθέσθαι τὸν παιῖδα ἐς ἀγγεῖον, καὶ ἀποκρύψαι τῆς χώρας, ἔνθα οἱ ἄδειαν ἔσεσθαι πλείστην ἠπίστατο· λύκον μὲν δὴ ἐπιχειρεῖν τῷ παιδί· δράκοντα δὲ ἰσχυρὸν ἀνέχειν τὴν φρουρὰν, ἐσπειρωμένον περὶ τὸ ἀγγεῖον. ὡς δὲ ὁ πατήρ ἦλθε τοῦ παιδός, τὸν δράκοντα ἐπιβουλεύσαι τῷ παιδί ἐλπίζων, ἀφήσιν τὸ ἀκόντιον, καὶ ἐκεῖνόν τε καὶ ὁμοῦ τῷ δράκοντι τὸν παιῖδα ἀπέκτεινε· διδαχθεῖς δὲ ὑπὸ τῶν ποιμαίνοντων, ὡς εὐεργέτην καὶ φύλακα τοῦ παιδός ἀπεκτονῶς εἶη, μίαν τὴν πύραν τῷ δράκοντι καὶ τῷ παιδί ἐποίησεν ἐν κοινῷ τό τε δὴ χωρίον εὐοικεῖναι καὶ ἐς τόδε καιομένη πυρᾷ φασι, καὶ ἀπὸ τοῦ δράκοντος ἐκείνου τὴν πόλιν ὀνομασθῆναι ³.

L'Estrange largely increased the former standard edition, that published by Heinrich Steinhöwel (Ulm, 1476; Augsburg, 1477-1480), whose edition added the fables supplemented by Avianus, a Latin poet of the late Empire, and by Rinuccio da Castiglione, an Italian humanist who edited a Latin translation in 1492.

(...) *The Amphictyons, when they published their decree for the destruction of the cities in Phocis, gave it the name of Amphicleia. The natives tell about it the following story. A certain chief, suspecting that enemies were plotting against his baby son, put the child in a vessel, and hid him in that part of the land where he knew there would be most security. Now a wolf attacked the child, but a serpent coiled itself round the vessel, and kept up a strict watch. When the child's father came, supposing that the serpent had purposed to attack the child, he threw his javelin, which killed the serpent and his son as well. But being informed by the shepherds that he had killed the benefactor and protector of his child, he made one common pyre for both the serpent and his son. Now they say that even today the place resembles a burning pyre, maintaining that after this serpent the city was called Ophiteia*⁴.

A second contribution intends to analyze the reception of the general theme among the different versions of the fable. We will now concentrate on the place of the *Book of Syntipas* within the whole transmission of the text.

2. *The Byzantine version of the Book of Syntipas.*

The origin and composition of the so-called *Book of Syntipas*, unreachable for Loiseleur-Deslongschamps⁵, seem nowadays quite well known after the comprehensive studies published by Comparetti, Perry, and Maltese⁶. They agree in suggesting that the very first version of the Book should have been written in Persian before the IXth. cent.,

when it should have been translated into Arabic by Musa ben Isa al Kesrawi, whose death happened in 874. This Arabic version should have been after translated into Syriac, and it was this Syrian text which should have originated the Greek translation, made towards the end of the XIth. cent. by Michael Andreopoulos, who offered his work to a prince identified by Comparetti with Gabriel of Melitene. The exact knowledge of the origin is blocked by the misleading extant state of the textual transmission, given that, as abovesaid, no rest remains of the Indian, Persian and Arabic versions. An alternative hypothesis suggests that the Greek translation was made towards 1080 by Simeon Seth, a Hebrew physician working at the Byzantine court ⁷, although it is not clear if he was reading the Arabic, the Persian or the Syriac text ⁸. Actually Simeon translated the Arabic *Calilah and Dimnah*, entitled in Greek *Στεφανίτης καὶ Ιχνηλάτης* ⁹. Nevertheless, it must be said that here does exist a manuscript tradition attesting the Persian and Syriac text ¹⁰, which is not the case of *Sendebār*.

New and valuable suggestions on the Greek version can be obtained from the text itself. The Byzantine text goes as follows:

Ἦν γάρ τις στρατιώτης ἀνὴρ, ὃς τῷ βασιλεῖ καὶ τοῖς ὑπ' αὐτῷ μεγιστᾶσι τῆς οἰκειᾶς ἔνεκεν ᾠκεῖωτο γενναιότητος. κύνα δέ τινα ὁ τοιοῦτος ἐκέκτητο ἀπ' αὐτῆς τῆς γεννήσεως παρ' αὐτοῦ ἀνατραφέντα καὶ τὰ παρ' αὐτοῦ τούτῳ ἐπιταπτόμενα ὥσπερ τις

The formal characteristics of the text give us huge information on the whole of the work. First of all, the Byzantine *Syntipas* is written in a literary language which seems intended for a high-cultured diffusion. In this tale, the author uses constantly the dative case as well as many middle and passive forms. Dative instances are 29, that is to say, a dative case at each line of the text, namely βασιλεῖ, αὐτῷ (*ter*), τούτῳ, πατρὶ, ἀνδρὶ, λόγῳ, δορυφόρῳ, τῷ οἰκῆματι, τῷ κυνὶ, ταύτῃ, τῷ παιδί, ὕπνῳ, αἵματι, τῷ ξίφει, τῇ κεφαλῇ/, τῷ σῶ κράτει, ἐκείνῳ (...) τῷ στρατιώτῃ, and ἐπευχαῖς. Middle forms are 22, a high frequency also, namely *wkeiwto*, ἐκέκτητο, παρεγένετο, θεασόμενος, περιβάλλεται, ἀράμενος, προσκαλεῖται, παρακαθημένου, ἐπειγόμενον, ἀπηργάσατο, *eijsercomenou*, *qeasameno*", *genomeno*", *keimenon*, *metemel eto*, *ajpw nato*, *sumbhsetai*, *metamel omeno*", *ajhtrafenta*, *epitattomena*, *katecomenou*, and *l el uqrwmenon*. The passive forms are 4, namely *ejerqei'*, *qumwqei'*, *parabl abenta*, and *ajpoktaqenta*. If we now check the indicative past forms in order to evaluate the use of the augment, we will notice that all of them show a completely regular application of the Classical rule: the sixteen past forms are all of them provided with the augment –a nineteenth form, ἐπανῆκεν, being in any case ambiguous-, a half with the syllabic augment, viz. *ekekthto*, *upanecwrhsen*, *paregeneto*, *sunesthsen*, *ajpekteinon* (bis), *eijnw*, and *metemel eto*, and a half with the temporal one, viz. *wkeiwto*, *ajphei* (bis), *parhggeilen*, *ajphrgasato*, *prosaphnthsen*, *ajhrhken*, and *ajpw nato*. Therefore, at the morphological level the language of the text is perfectly Classical ¹¹.

¹¹ Take as a reference the synthetic plusquamperfect in the authors checked by HINTERBERGER, MARTIN. 2007. "Die Sprache der Byzantinischer Literatur. Der Gebrauch der synthetischen Plusquamperfektformen", in HINTERBERGER, M., SCHIFFER, ELISABETH, and HÖRANDNER, WOLFRAM [ED], *Byzantinische Sprachkunst*, Berlin & New York: De Gruyter. 107-142.

At the syntactical and the lexical level some data lead to a slightly different conclusion, since there are some clear arguments pointing to a later chronology. Certainly, such a short text attests non-frequent, even poetical prepositional clusters as *th' oikeia* (...) *ehekēn gennaiotēto* and *pro' th' kefalē*. As a matter of fact, all the 19 prepositional clusters can be ranged as perfectly Classical. Take also into account particles as *γούν* (*bis*), *μὲν οὖν* and *οὖν*, and six instances of absolute genitives, namely *προσκατεροῦντος*, *ὑπνώσαντος*, *κρούσαντος*, *παρακαθημένου*, *κατεχομένου*, and *εἰσερχομένου*. Finally, there are examples of articular and final infinitive, *τοῦ ἐπανελθεῖν*, and *τοῦ μηδένα* (...) *προσπελάσαι τῷ οἰκήματι*, respectively. But the temporal value accorded to the perfect forms *κεκοίμηκεν*, *έωρακώς*, *εἶρηκεν*, and *ἀνήρηκεν*, the first one coordinated with an aorist, suggest that the text belongs to a post-Classical author. Finally, both the lexical selection and the word order follow literary, Classical models, viz. *τῆς οἰκείας ἔνεκεν ὠκείωτο γενναιότητος, γεννήτορας*, and so on. Koine terms are rare indeed: as a morphological coinage, such a term as *κυνάριον* can be perfectly Classic¹², and the same comment is to be made about *ἄμφια*¹³, although both of them suggest a later datation; the adverb *ἀκόπως*, as the adjective from which it is derived, also point to a post-Classical datation, but it can hardly be alluded to as a Koine term¹⁴. A different case deals with the adverb *ειθούτως*, in itself a coinage of the later ages of the Greek language, probably not attested before the Christian era¹⁵. In the whole text we also notice an only Latinism, viz. *παλάτιον*¹⁶. Two other post-Classical

¹² The same word is actually attested at X. *Cyr.* VIII 4, 20. On this diminutive suffix belonging to the colloquial stratus of the language, see CHANTRAINE, PIERRE. 1933. *La formation des noms en grec ancien*. Paris: Klincksieck. 74-75. The Greek Koine certainly made a wide use of this formation.

¹³ As a Classical instance, see S. fig. 400 Radt.

¹⁴ As a Classical instance, see Hippocrates *Vict.* III 70. The opuscle *On Diet* can be placed in the IVth. cent. BC.

¹⁵ It should be not without sense to consider the transmitted form a ghost word instead of the adverbs *εστούτο*, *then*, or *ειωθούτως*, *as usually*.

¹⁶ The borrowing *παλάτιον* is widely attested from the early centuries A.D., cf. LAMPE, GEOFFREY WILLIAM HUGO. 1961. *A Patristic Greek Lexicon*, Oxford: Clarendon UP. 998. See for instance *Acts of Peter and Paul* 10, 31 and 84. The term must not be included among Latinisms, as it is attested with the meaning *sword* from Alcaeus XV 6 onwards.

words, namely *μεγιστᾶσι* (dative) and *ἀπώνατο*, deserve a particular comment. The first one is attested in the *Septuaginta*, Menander and the New Testament ¹⁷, and the second in Lucian and Proclus ¹⁸. To sum up, the text shows the trends of an Atticist author writing towards the first second or third centuries A.D.

Our conclusion on the language of this tale suggests that the *Book of Syntipas* is not a literal translation of the Syriac version, but an original Greek text written long before the Byzantine age. Any translation, especially from a language with different morphological and syntactical patterns, should produce such a literary text, which is only comparable with the more cultured prose. Actually some years ago Cupane suggested that the so-called Byzantine version should be considered just a free adaptation ¹⁹: the author should have created his own text, characterized by a literary expression modelled on the Classical authors. But there is a striking coincidence that cannot be simply casual. Pausanias tells about a powerful lord who suspected a conspiracy against his small child, *δυνάστην ἄνδρα ἐπιβουλήν ἐχθρῶν ἐποπεύσαντα ἐς νήπιον παῖδα*. The Byzantine author of the *Book of Syntipas* -say Michael Andreopoulos- writes that the mother recommended to her husband to give careful attendance to her small child in leaving him to his father's protection, *καὶ τὸν ἑαυτῆς νηπιάζοντα παῖδα παρὰ τῷ πατρὶ λιποῦσα ἀκριβῶς αὐτῷ προσέχειν τῷ ἀνδρὶ παρήγγειλεν*. The adjective *νήπιον* and the participle *νηπιάζοντα* are nearly perfect synonymes, for they only differ regarding the aspectual and modal nuances exclusive of the participle form. The verb *νηπιάζω* is attested at very few Classical authors, namely the Hippocratean *Epidemics* and the poet Erinna ²⁰. Post-Classical authors were not more interested in the word, for it occurs only at Saint Paul

and Porphyry²¹. In the Byzantine literature, there is only an instance at the *Physiologos*²². Yet the big distance, literary and social as well, that separates both Byzantine texts, *Physiologos* and *Syntipas*, makes quite difficult any influence between them. On the other hand, the adjective νήπιος is also not so common as it could seem: besides Homer, the tragedians, Hippocrates, Plato, Aristotle, and some isolated instances attested in Antiphon, Aeschines and Lycurgus, it is noticeable indeed that the word lives a certain renaissance in the Imperial Age, when it is attested in Josephus, Pausanias, Apollodorus, and many papyri. Anyway, the wording νήπιον / νηπιάζοντα deserves our attention, and gives room for a strong case of intertextuality. Our suggestion is indeed that the *Syntipas* text belongs to the same tradition attested in Pausanias. Until now the scholars paid an extreme attention to the words of the prologue: εἰς τὴν παροῦσαν Ἑλλάδα αὐτὸς φράσιν μετήγαγον. We now take for granted that the extant text is not a translation, as it is also false that it is written in the contemporary Greek language of an XIth. century author. The text itself seems ambiguous, for the participle παρούσαν can suggest two different translations: either *I translated myself the text to the contemporary Greek language*, or *I translated myself the text to this language which is offered to you, to the Greek one*. Yet this second translation looks much more rhetorical and vague, for the participle does not give us a concrete information.

3. *Why this text must be a translation? Or are fables transmitted only by a literary way?*

Given that the Byzantine text can not be a translation, we must find an answer for the following paradox: it has long since been recognized that the *Book of Syntipas* offers the best text, the closest to the hypothesized original work²³. Until now this original could be reached only by means of a chain of lost texts, whose (in)direct heir had to be the Greek *Syntipas*. The translation-theory denied from the very beginning any originality of this version. Consequently, a more far and old version had to be found. In the quest for this literary Graal, the first author who argued for the Indian provenience of the whole tradition was Görres²⁴, and for the last two centuries his theory has been continued or supported by many authors²⁵. Anyway, it must be said that one of the first scholars dealing with the question, Silvestre De Sacy, just accepted that in some moment the tales were transmitted from India to Persia²⁶. It was his fellow Loiseleur-Deslongschamps who emphasized the theory of the Indian origin²⁷.

23 D. COMPARETTI (1869: 28): *Di tutte le versioni quella che meglio ed in più gran parte rappresenta l'originale è il Syntipas. Ad eccezione del principio, fin là dove si tratta della prima educazione del principe, nella qual parte altre versioni, come abbiamo veduto, meno compendiano il testo primitivo, per quasi tutto il resto il Syntipas trova riscontro in una o più versioni, e dal confronto risulta ch'essa segue l'originale con maggior fedeltà che qualunque altra.*

An alternative theory suggests that the origin must be placed in Persia²⁸. Yet this view does not imply any substantial change –unless we give an extraordinary relevance to the hypothesized Buddhist inspiration²⁹–, for the main idea continues to be the same: it is not so important that there is an Eastern origin for both the genre and the tales; on the contrary, the substantive basis of this Eastern theory states that there is no link between the Asian and the European Indo-European cultures, as if no inherited tradition were at work.

There is room, however, for a completely different scope to the question if we accept the (non-exclusive) Greek origin of the tale. In support of this theory it is to be taken into account the abovesaid version afforded by Pausanias, which was obtained during his travels throughout Greece. The tale was part of the local traditions kept in Phocide, a region far from the most active cultural centres all along the Greek history. The antiquity of the legend reported by Pausanias can be rooted in the Indoeuropean heritage, as it was the case with many other fables, myths, and legends. The religious value accorded to the testimonies delivered by Pausanias has been reevaluated and praised in the recent years³⁰. No doubts are formulated on his accuracy as a real and

sécondaires, est un fait tout à fait particulier du conte et de l'apologue chez les indiens, et je ne le retrouve dans aucune des productions anciennes et authentiques des littératures persane ou arabe.

29 Another variant consists tries to find the origin of the work in a Pythagorean milieu, cf. CARRA DE BAUX, BERNARD. 1934. *Encyclopédie de l'Islam IV*, Leiden: Brill, 454. There is a coincidence with Perry's view that the IIInd. cent. A.D. *Vita Secundi*, a work having a strong Pythagorean trend, furnished a literary model to the Persian Sendebad, cf. B.E. PERRY (1959).

credible witness regarding all the accounts he gives us on whatever matter³¹. Therefore, there is a general favorable agreement about Pausanias' interest in Greek religion³².

Finally, about the tale of the faithful dog there is another theory suggested by the French anthropologist Schmitt. After a report on a popular cult to a doglike saint written towards 1250 by the medieval compiler Étienne de Bourbon³³, Schmitt concludes that the legend of the protecting dog, now canonised, had its base in an ancient Indo-European folkloric background; the result was a particular cult that emerged in a certain moment in the Loira and Rhone area³⁴. Schmitt stresses the strong mechanisms of the oral tradition as the most determining factor regarding the reception of the tale. From a different perspective, this presence of the legend in Western Europe, being independent from any concrete literary source, shows that the complex translation-theory after an Indian original must be deeply revisited.

IX: *It is possible to demonstrate that he was quite consistent about visiting sites in person, and often went out of his way to see antiquities in obscure villages. (...) He consistently seeks out the oldest as the most interesting, almost completely neglecting monuments and dedications later than 150 B.C.*

32 HABICHT, CHRISTIAN. 1985. *Pausanias' Guide to Ancient Greece*, Berkeley & Los Angeles: California UP. 151-152: *Pausanias seldom loses sight of his goal, but he is, as it has often been observed (...) attracted by sacred buildings, and his interest in religion is documented on every page of his work; it is here that he most reveals his personality. Although he was a learned and skeptical man, he still had faith in the gods, or rather, perhaps, in the divine.* On Pausanias' religious beliefs, see DELLA SANTA, MARIO. 1999. *La religiosità di Pausania*, Bellinzona: Casagrande.
